

MARKETS MOVE.
So should you.

Jigsaw*Mobile*

JigsawMobile provides real-time charts with a variety of options designed for market professionals.

Intra-day and historical charts

JigsawMobile high-performance chart server produces charts from tick data and historical data, and can be configured to produce charts for various time intervals (depending on the data source) – for example tick charts, daily, weekly and monthly charts, as well as intra-day charts with pre-defined intervals, such as 3 minutes or 5 minutes. Charts can be displayed using candlestick, bar or line styles, with volume data (if appropriate).

simple tick chart - Nikkei 225 index

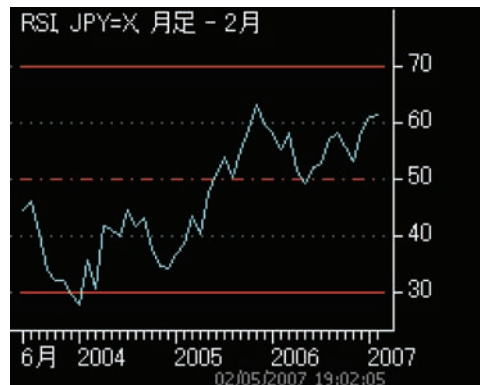

daily chart with volume and DSMA - Nikkei 225 index

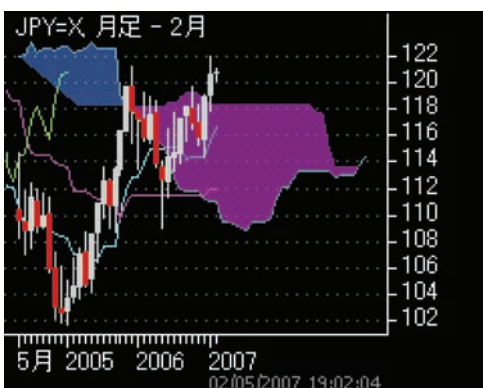

Technical Analysis

JigsawMobile charts include several studies and indicators for technical analysis:

- ◆ IKH (Ichimoku Kinko Hyo)
